

## Frequently Asked Questions – EDDP

1. Where do I find the files for the EDDP demo?
  - a. Download from GitHub - Xilinx/IIoT-EDDP
  - b. Copy files from /SDSoc/SD\_Card/art7\_z7\_10 to SD card
2. Firewall settings?
  - a. If you are using an enterprise/corporate machine, turn off the firewall
  - b. This allows the device to talk to the web browser freely
3. What are the recommended browsers?
  - a. Works best with Firefox and Chrome
4. I can't find the Ethernet cable in the kit?
  - a. The kit does not include the Ethernet cable
5. IP settings on my computer?
  - a. Connect the Ethernet cable to your computer
  - b. Network and Sharing Center -> Change adapter settings
  - c. Select the Ethernet cable and click on properties
  - d. TCP/IPv4 -> Enter 192.168.42.xxx ( any number in the place of xxx from 0-255 except 123)
  - e. Enter Subnet value -> 255.255.255.0
  - f. Click ok to finish
6. Recommended version of SDSoc?
  - a. Best results with SDSoc 2017.1
7. Compiler ran into the know error of MS Visual C version
  - a. 17.1 scripts check for the availability of version 2015 and the supplied installer doesn't install the 2015 if a newer version is already installed. Please read AR 6907 for the solution with setting the environment variable to disable the version check.
